

Latika Sivakumar

PROFESSIONAL SUMMARY

Motivated Full Stack Developer and Artificial Intelligence and Data Science student with hands-on experience in mobile application development, backend API development, and web scraping. Skilled in FastAPI, Python, MySQL, Flutter, and React Native for building scalable applications. Familiar with Generative AI concepts including LLMs and RAG. Passionate about developing practical real-world software solutions.

EDUCATION

B.Tech Artificial Intelligence and Data Science | 2022-2026

Erode Sengunthar Engineering College

CGPA: 8.2

HSC | 2021-2022 & SSLC | 2019-2020

Vijayalakshmi Matriculation Higher Secondary School

81.66% & 72.2%

AREA OF INTEREST

Full Stack Development, Backend API Development and Mobile Application Development

SKILLS

- Programming Languages: Python, SQL, Dart, JavaScript
- Web Scraping & Automation: BeautifulSoup, Apify API, Requests, Selenium
- Backend Technologies: FastAPI, REST API
- Mobile Development: Flutter, React Native
- Generative AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG)
- Tools: VS Code, Git, Android Studio, Xcode, PyCharm, Postman

HANDS-ON EXPERIENCE

INTERNSHIP

Soft Suave Technologies

Role: Mobile Application Developer

Duration: 8 Months

Internship Highlights:

- › Developed and maintained cross-platform mobile applications using Flutter and React Native.
- › Built responsive and reusable UI components for mobile applications.
- › Integrated REST APIs with frontend applications for seamless data communication.
- › Worked with backend teams to connect mobile applications with FastAPI-based services.
- › Debugged application issues, fixed performance lag, and improved application stability.
- › Participated in feature development, testing, and deployment activities.
- › Contributed to the implementation of new features to enhance overall product quality.

PROJECTS

1. Indeed Scraper

Technologies: Python, Apify Client, CSV

Description:

Developed a Python script leveraging the Apify API to extract job listings for different roles in India. The script collects job title, company name, location, salary, job description, and posting date, and saves the data into a structured CSV file for analysis.

Key Features:

- Integrated Apify API for automated job scraping.
- Handled missing data and cleaned extracted records.
- Exported clean, structured job data into CSV format for easy reporting and further processing.

2. Pin Your Note

Technologies: Python, Tkinter, SQLite, smtplib

Description:

Developed a desktop-based note-taking application that allows users to create, manage, and receive reminders for notes. The application supports user registration and login, with all user and note data stored in a local SQLite database. Reminder functionality is enhanced through automated email alerts and popup notifications using Python's threading and SMTP modules.

Key Features:

- User authentication system with registration and login capabilities.
- Full CRUD (Create, Read, Update, Delete) operations on notes.
- Sends reminder alerts via both popup and email using Gmail SMTP.

3. Task Management System

Technologies: Python, FastAPI, MySQL

Description:

Developed a backend-based task management system using FastAPI to manage daily task operations efficiently. Designed RESTful API endpoints to perform task creation, retrieval, updating, and deletion operations. Structured the application with clean endpoint handling and database integration.

Key Features:

- Developed REST API endpoints for task CRUD operations.
- Integrated MySQL database for persistent task storage.
- Tested API endpoints using Postman and Swagger UI.

ACHIEVEMENTS

- First prize in Code Debugging at Info Institute of Engineering, Coimbatore (March 2025).
- Presented a paper at an international conference titled "AI in Healthcare and Wellness" at Kalaingar Karunanidhi Institute of Technology, Coimbatore (Nov 2023).
